CRFManager®

The University of Edinburgh has developed a web-based resource management system (CRFManager®) for the administration of clinical research studies and other day-to-day aspects of facility management.

Clinical Research Facility Management Software

CRFManager® is a web–based resource management system developed by the University of Edinburgh's Clinical Research Facility (CRF), primarily used for the administration of clinical research studies and other day-to-day aspects of facility management.

The application has two main components: (i) study management; and (ii) resource management.

CRFManager® software

This non-exclusive licence for the CRFManager® software includes hosting of the software at the University of Edinburgh on behalf of the Licensee, as well as training.

The initial fee for this product is £3,200 (inclusive of hosting fee). At the end of the first year term, an annual renewal fee is payable for continued access and upgrades.

Licence considerations

The CRFManager® licence above is available to not-for-profit organisations only.

Commercial terms will be considered on an individual basis for this software. Please click on the '**CONTACT US**' button for details.
